About me

As a Computer Science graduate and Web Developer, I am passionate about creating innovative and user-friendly web applications that meet the needs of modern businesses and consumers. My technical skills and knowledge of programming languages such as HTML, CSS, JavaScript, Python, and PHP enable me to create dynamic and responsive web applications that are visually appealing and easy to use.

Skills

SQL

JavaScript

HTML, CSS

Wordpress, WP Bakery

Python

Communication

PHP

Django

React

Education

2021-2023

B.Sc.

Majoring in Computer Science, Minor in Web Design

Carroll University

2019-2020

B.Sc.

Majoring in Computer Science

College of Wooster

Experience

2023

Web Development Internship

Brand Executives

- Collaborated with team members to develop responsive web designs and user interfaces for desktop and mobile devices.
- Developed custom WordPress themes and plugins to meet client needs, using PHP and WordPress development best practices.
- Participated in code reviews and provided feedback to improve the quality of the team's work.
- Utilized web analytics tools to track website performance and identify areas for improvement.
- Worked with version control systems like Git to manage code-base.
- Implemented SEO best practices to improve website visibility and rankings.

2022

Frontend Developer Intern

Data2Profit

- Collaborate with other developers, designers, and stakeholders to create and implement user-friendly interfaces.
- Write clean, well-organized, and maintainable code using modern front-end technologies such as HTML, CSS, and JavaScript.
- Use version control systems such as Git to manage code changes.
- Optimize application performance and implement responsive design techniques.
- Write and maintain documentation for front-end development processes.
- Participate in code reviews and ensure that the code adheres to best practices and coding standards.

2022

IT Technician Intern

Carroll University

- Provide technical assistance to computer system users.
- Install, modify, and repair computer hardware and software.
- Diagnose and troubleshoot computer and network problems.
- Configure and maintain network equipment, such as routers and switches.
- Perform regular system backups and disaster recovery operations.
- Document technical processes and procedures.
- Assist in the maintenance and management of servers and other networked systems.

Projects

Weather App

Built working weather app. App connects to API for data and uses JavaScript, CSS, HTML, and JQuery.

Website Portfolio Built using React, Vite, and Tailwind

Interests

I enjoy Soccer, Chess, Coding, Ping pong, Video games, Music, and Movies.
